

A Client-Focused Solution in Fire and Essential Safety Measures

Who we are

Airmaster delivers Fire and Essential Safety solutions that complement a wide range of products and services.

Essential Safety Measures are an important, ongoing regulatory requirement for building owners, with all public and private buildings obligated to ensure regular maintenance under the Building Code of Australia.

Airmaster ensures buildings remain at the required operational level throughout their life, helping owners navigate the complexities and multitude of components, to ensure full compliance with Australian standards.

The Airmaster solution incorporates all operational aspects of Fire and Essential Safety Measures including; Fire Sprinklers, Special Hazards, Portable Equipment, Alarm Systems and Passive Elements.

In addition, consulting in areas such as Building Permits, Certifications and Audits complements these services.

About Airmaster

At Airmaster, our goal is to lead the way in integrated building services, combining HVAC&R, building automation, electrical, and fire systems to create smart buildings that are not only compliant with regulations, but also optimised for energy and resource efficiency. We strive to ensure that our buildings are comfortable, functional, and tailored to support our clients in achieving their sustainability and operational goals.

Established in Melbourne in 1988, Airmaster has grown to a network of 17 branches across Australia and New Zealand. Our holistic approach to building services leverages advanced data-driven virtualisation to revolutionise how we work, delivering enhanced productivity and continuous service. This integrated model offers a more cost-effective solution than traditional methods, providing our clients with innovative, customised support that's always available.

Essential Safety Measures

The ultimate responsibility of ensuring that all Essential Safety Measures are being correctly maintained and managed lies with the Building Owner – not their agent or tenant.

The maintenance of Essential Safety Measures ensures that the important safety systems within a building remain at the required operational level throughout the life of the building. The type of maintenance needed will depend on the complexity of the safety measures, the equipment, as well as the maintenance program required under the relevant standards.

Essential Safety Measures comprise the following:

- Fire Sprinklers and Pump Sets
- Fire Extinguishers and Blankets
- Early Warning Systems
- Fire, Smoke and Exit Doors
- Emergency & Exit Lighting and Signage
- Smoke Control Systems
- Fire Engineer Solutions
- Fire Windows, Fire-Isolated Stairs, Passageways
- Fire and Smoke Curtains
- Fire Related Materials
- Fire and Smoke Detection Systems
- Path of Travel
- Fire Hydrants

Our Products and Services

Our fully trained and qualified technicians provide complete Essential Safety Measures service and maintenance solutions across a wide range of specialised industries, designed to meet the specific needs of your building and relevant industry regulations and licensing

Fire Sprinklers

We offer maintenance services across wet sprinklers, deluge systems, pre-action systems, pump sets and storage tanks.

Alarm Systems

We ensure your alarm systems are regularly maintained, this includes interface testing, fire detection, smoke alarms and communication systems.

Portable Equipment

From extinguishers and blankets, to hose reels and hydrants, we can ensure compliance with maintenance requirements.

Consulting and Auditing

We have a national network of fire experts who look after building permits, certifications and fire safety, and system audits on your behalf.

Passive Elements

Our in-house, fully trained technicians ensure your fire and smoke doors, building elements and paths of egress meet legal standards.

Special Hazards

Our team are trained, qualified experts in gaseous systems, wet chemical and vortex management.

Our Markets

Airmaster Fire delivers services and solutions across a broad range of market sectors. With over 35 years of experience, we have technical and sector-specific experts and knowledge on-hand, achieving specialised results for all facility types.

- Education
- Transportation
- Retail Facilities
- Commercial Office Buildings
- Government
- Hospitality
- Aged Care
- Industrial
- Healthcare
- Data Centres
- Recreational Facilities
- Warehouses

Streamlined Fire Asset Maintenance with Uptick

Trusted by Airmaster Fire nationally and purpose-built for the fire protection industry, Uptick is an industry-leading fire asset maintenance software that drives our service and maintenance platform, allowing our expert team to deliver rich customer insights based on real-time visibility and compliance.

Uptick provides a centralised portal, where both customers and staff can access real-time updates on the status of works, generate reports and download compliance documentation, offering unparalleled transparency and efficiency in fire asset maintenance.

Real-time, on-demand information 24/7

Enhanced visibility and access to real-time, critical portfolio and compliance data 24/7, 365 days a year.

Consolidated reporting hub

A one-stop shop for reporting, the Airmaster Uptick driven portal improves visibility by consolidating compliance documentation, service quotes, defect quotes, and invoices in one easily accessible location.

Budget insights and analytics

Provides comprehensive budget insights to support long-term planning for maintenance, extended servicing and asset end-of-life.

Fully Secure and Encrypted

Having successfully passed through rigorous security auditing and penetration testing, you can safely and confidently upload and access important data and information.
